State of Louisiana

UNIFORM CONSTRUCTION CODE COMMISSION

JEFF LANDRY
GOVERNOR

BRAD HASSERT
EXECUTIVE DIRECTOR

To: Louisiana Inspectors
From: Tarah Revette, Administrative Director, LUCCC
Date: November 10, 2026
Subject: Manufactured Housing Installation Inspector classification

In July 2026, the Louisiana Uniform Construction Code Commission (LUCCC) adopted a proposed amendment to Rule 703 (LAC 55:VI.703) creating a new license classification: **Manufactured Housing Installation Inspector**.

The amendment must complete the formal rule promulgation process through the *Louisiana Register*. If the amendment is finalized and the classification is enacted, as anticipated by the end of December, public and private inspectors currently licensed with LUCCC may request that this classification be added to their existing licenses. Individuals seeking initial licensure will also be able to apply for this classification.

To perform inspections related to the installation of manufactured homes, a licensed LUCCC inspector **must hold the Manufactured Housing Installation Inspector classification**. Inspectors who do not hold this classification will not be authorized to conduct these inspections.

If enacted, applicants for this classification will be required to submit a course completion certificate from a HUD-certified Manufactured Housing Installation Inspector training course offered by a HUD-approved provider.

Below is information for a course approved by LUCCC; however, the commission will also accept certificates from any HUD-approved or HUD-certified Manufactured Housing Installation Inspector training provider.

Training Provider:	Manufactured Housing Educational Institute (MHEI)
Course Name:	Manufactured Housing Installation Inspector Training – Louisiana
Price:	$225

This online training course is found at: https://www.manufacturedhousing.org/course/manufactured-housing-installation-inspector-training-louisiana/.
